

Here are three ways to measure your finger at home. It may be necessary to try all three. To accurately get your size, you should be measured by a professional. There are different types of measuring tools that professionals use. The style of the ring can impact the fit, the wider the ring the tighter the fit. Pipe cut bands fit tighter than comfort fit bands of the same width. If you are unsure how the design of a ring may impact the size please call us Aura Diamonds for advice.

The Paper Test

- Print and cut the paper ring sizer below.
- Make a slit by making a small cut on the line labeled "Your Size."
- Slide the pointed end through the slit until the number gets to "Your Size." Make it Snug not Tight.
- Double check for accuracy

The Circle Test

- Print the chart of the ring size circles
- Find a ring that your partner wears on the correct finger.
- Place the ring over the circle. The circle should be completely inside the ring.
- Double check for accuracy.
- This is most secretive way to determine size of ring of one significant other.

The String Test

- Cut a small piece of string, thread or ribbon.
- Wrap it around your finger to get an accurate measurement. But do not wrap it too tight. Snug not Tight. For Accuracy: Do this 3 times.
- Compare the measurement against the sizing chart.
